**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-30, drawn to a method for producing a stamp or a printing plate by applying liquid and hardenable material in layers on a substrate wherein the application is carried out with print technology.

Group II, claim(s) 36-41, drawn to a device with a print head, at least one nozzle, and metering means.

**PCT: Lack of Unity  
*Priori***

2. Lack of unity of invention may be directly evident "a priori," that is, before considering the claims in relation to any prior art, for example, independent claims to A + X, A + Y, X + Y can be said to lack unity a priori as there is no subject matter common to all claims.

In the instant case, the invention of Group I is drawn to a method for producing a stamp or a printing plate by applying liquid and hardenable material in layers on a substrate using print technology. Whereas the invention of group II is drawn to a device comprising of print head, at least one nozzle, and metering means. Since there is no

Art Unit: 4172

subject matter common to all groups, the restriction is proper for the reasons set forth above where lack of unity of invention is evident "a priori".

***Conclusion***

No claim is allowed.

All pending claims are subject to restriction/election requirement.
